

Becasue satellite radio is a paid service, the National Association of Broadcasters should not be permitted to dictate the content provided. I respectfully urge the FCC to reject the NAB's petition 04-160. The FCC might better suggest to the NAB that they work hard to operate in the market by improving service! Many subscribers to sattilite radio joined up because of the constant commercials and lack of content. One must ask how many "zany" morning radio shows can fit on the dial. Sattellite radio provides an alternative which should be permitted to provide as much content as possible. Its the fair thing to do.

Respectfully,

Timothy J. Cunningham
